Data quoted represents past performance, which is no guarantee of future results. Risk of loss is possible. Performance returns stated net of fees. Current performance may be lower or higher than the performance quoted. The investment return and the principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Periods greater than 12 months are annualized. Returns are historical and include change in share price and reinvestment of all distributions. An investor cannot invest directly in an index, and index performance does not reflect the deduction of fees, expenses or taxes. There is no guarantee that any investment objective will be achieved. There is no guarantee that any historical trend illustrated in this report will be repeated in the future, and there is no way to predict when such a trend will begin.

During certain periods presented above, the Advisor waived fees and/or reimbursed expenses. Without this arrangement, performance would be lower.

Risks. There are special risks associated with investing in the Fund. All investments involve risks, including loss of capital, and there is no guarantee that investment objectives will be met.

Since the Fund concentrates its assets in **international real estate securities**, an investment in the fund will be significantly impacted by the performance of the real estate markets. Risks of investing in real estate securities include falling property values due to increasing vacancies or declining rents resulting from economic, legal, or technological developments.

Special risks of investing in foreign securities include (i) currency fluctuations, (ii) lower liquidity, (iii) political and economic uncertainties, and (iv) differences in accounting standards. Certain foreign securities may represent small- and medium-sized companies, which may be more susceptible to price volatility and less liquid than larger companies.

Percentages may differ from data in the Fund's financial statements due to the effect of fair value pricing of foreign securities. The fund implements fair value pricing when the daily change in a specific U.S. market index exceeds a predetermined percentage. In the event fair value pricing is implemented on the first day of the period, the fund's return may diverge from the performance of its benchmark, which is not fair valued. This divergence is usually reduced on the day following the implementation of fair value pricing by the fund, as the value of the securities in the index that are held by the fund typically move closer to the fund's fair valued price when the market reopens.
